

Course: crucial techniques and strategies to build resilience in our patients

Address: <https://asadis.net/en/course/how-to-build-resilience-in-our-patients/>

Duration: 2h30

Type of course: continuing education

Location: online course

Individual price: \$96.00

Overview:

Behind any request for therapy, often unbeknownst to them, patients are asking for help to increase their resilience. When resilience is suboptimal, the mastery of strategies acquired in therapy and long-term changes are more difficult to achieve, and relapse is more probable. In this workshop, Dr. Munoz explains how to conceptualize resilience and explains how you can reinforce your patients' strengths while creating an in-session environment where resilience can be practiced. She also presents concrete strategies to support and increase your patients' resilience by practicing a growth mindset, counteracting cognitive biases, developing a healthy relationship with emotions, bringing physical arousal into the resilience zone, and developing and practicing powerful habits that support long-term resilience. Ultimately, this workshop will enable you to help your patients thrive even when faced with adversity.

Learning objectives:

1. Define and conceptualize what resilience is
2. Understand how resilience can be fostered with patients presenting various mental health issues.
3. Apply specific cognitive, emotional, physical and behavioral strategies to increase resilience.

Learning material:

This workshop includes theory as well as clinical examples. It includes videos ranging from 5-15 minutes in length. The PowerPoint of the workshop can be downloaded.

Audience: This training is intended for mental health professionals.

The expert, Dr. Valentina Munoz

Dr. Valentina Munoz, psychologist, is a clinical psychologist specializing in cognitive-behavioral therapy (CBT) for treating anxiety and stress-related issues in adults. She earned her PhD in clinical and research psychology from Université de Montréal, Canada, in 2005. With extensive experience in private practice, Dr. Munoz provides psychotherapy and offers workshops for both the general public and mental health professionals. Her work focuses on anxiety disorders, burnout prevention, resilience, and stress management. Dr. Munoz spent 10 years at the Douglas Mental Health University Institute, where she treated individuals with severe anxiety disorders and complex co-occurring issues, while also supervising PhD psychology interns. She has also served for many years as an external resource for the Canadian Armed Forces, supporting veterans coping with PTSD. Valentina Munoz is a licensed member of the Ordre des Psychologues du Québec and is fluent in French, English, and Spanish.

Syllabus

PowerPoint

Presentation

Building a strong foundation

Definition & control

Healthy habits to strengthen resilience

Knowing your patient's strengths to benefit resilience

Doing is key

The ABC model as a framework to implement strategies that increase resilience

ABC components

ABC concrete exercises

Engaging a resilient mindset

Growth and fixed mindsets

Impact and Miswanting biases

Biases counter strategies

Mindfulness & mindset takeaways

Coping with emotions

Emotion foundations & white polar bear exercise

Emotional avoidance & lack of permanence

Positive emotional states and happiness

Normalization of emotions

Desensitization of emotions and takeaways

Optimal physiological arousal for resiliency: The resilient zone

The Trauma resiliency model (TRM)

The five skills of the TRM and physical takeaways

Power habits to increase resilience

Social connections, reference points and savoring

Gratitude, kindness, experiential activities and resetting the adaptation bias

Behavioral takeaways
