

Course: cbt for obsessive compulsive disorder: a clinician's guide

Address: <https://asadis.net/en/course/mastering-cbt-for-obsessive-compulsive-disorder-clinician-guide/>

Duration: 3h

Type of course: continuing education

Location: online course

Individual price: \$60.00

Overview:

Cognitive-Behavioural Therapy (CBT) with Exposure and Response Prevention (ERP) is a well-established, evidence-based treatment approach that can significantly improve OCD symptoms within a few months, transforming a chronic condition with poor long-term outcomes into one with significantly better and lasting improvements.

It is highly effective in alleviating the profound impact that OCD can have on functioning and quality of life.

This workshop is designed to equip participants with the skills to assess, conceptualize, and plan an individualized treatment for clients presenting with OCD. Participants will learn a variety of CBT interventions designed to help clients :

- reduce intrusive obsessions;- prevent compulsive behaviors;- identify and modify unhelpful beliefs;- decrease avoidance;- manage distressing emotions and physical sensations.

This workshop will go over how to deliver each treatment component, from the initial assessment to the implementation of strategies for relapse prevention and termination. By the end of this training, you will have the necessary tools to reduce the impact that OCD has on your clients' lives.

Learning objectives:

1. Conduct a thorough assessment for OCD and co-morbid conditions
2. Formulate a CBT case conceptualization for OCD and develop an individualized treatment plan
3. Implement each advanced CBT treatment component for OCD

Learning material:

A theoretical course illustrated with clinical examples. This course is composed of videos of 5 to 15 minutes each. The PowerPoint of the course to download.

Audience: This course is intended for mental health professionals.

The expert, Dr. Deborah Schwartzman

Dr. Deborah Schwartzman is an experienced psychologist who provides clinical services to a wide variety of clients and patients. She however specializes in providing support and treatment for individuals struggling with post-traumatic stress disorder, anxiety disorders, and mood disorders. She has extensive research and clinical experience in Cognitive Behavioural Therapy (CBT), a well-established and evidence-based approach. In addition to her clinical work, Dr. Schwartzman provides clinical training and supervision to graduate students and interns as well as mental health professionals.
